

The

FLAT FACE

MATRIX

Operating Pressure
1,500 PSI (103 BAR)

Flow Rate
40 GPM (151 LPM)

Burst Pressure
4,500 PSI (310 BAR)

3/4" NPT

12 Different Colors & Sizes

MATRIX FLAT FACE

FFR210

Flat Face Matrix nozzles are color coordinated and will only fit with a receiver having the same corresponding color preventing cross contamination.

FFN210

The Flat Connecting Surface reduces soil build up on the Nozzle Face eliminating the need for plugs.

ADVANTAGES

- Highest possible Flow Rate in the Industry for Fluid Transfer
- Available in 12 different Sizes and Colors Eliminates Cross Contamination
- The Flat Connecting Surface reduces soil build up on Nozzle Face
- Long Lasting, quick, and easy Ball Latching Mechanism
- Corresponding guides for easy quick connection
- Eliminates the need for Nozzle Plugs
- Reduces time consuming Clean Up
- Universal Evacuation Tool for all Receivers
