

# GREASE MATRIX

Grease Matrix is an innovative, patent pending, solution for bulk, high pressure, viscous fluid transfer.

Grease Matrix is the first of its kind: a flat-face dry break connector that will connect and disconnect under line pressure. Safety features will not allow grease transfer until the couplers are connected properly.

## MADE IN THE USA

**Max Operating Pressure**  
5,000 PSI (344.73 BAR)

**Flow Rate**  
70 LB/MIN 31.75 KG/MIN

**2 Different Colors & Sizes**  
3/4" NPT

# GREASE MATRIX

Grease Matrix nozzles are color coordinated and will only fit with a receiver having the same corresponding color preventing cross contamination.

**GR 210**

**GN 210**

## ADVANTAGES

- Bulk filling
- Connect and disconnect under line pressure
- Flow Rate 70 pounds per minute (based on pump, hose length/diameter, and specific gravity).
- Clean, efficient and safe
- 2 colors and sizes  
GR210/GN210 (Orange)  
GR220/GN220 (Grey)
- Patent pending
