

The image shows several fuel receiver components on a yellow, rusted metal surface. In the foreground, there is a red receiver (R150A) and a silver receiver (R150). In the background, there is a black receiver and another silver receiver. The receivers are cylindrical with a hexagonal base and a threaded end. The red receiver has a black circular logo on its end that reads "FASTFILL SYSTEMS" and "www.fastfillsystems.com".

# FUEL RECEIVERS

**STANDARD R150**  
2" NPT Threads

Our receivers are compatible with all major fast fueling diesel nozzles

Nickel plated steel

**R150A**  
Aluminum construction  
2" NPT Threads
